Hazardous Materials Inventory List

Please provide the following information on all hazardous materials stored or used in the building. **Please include MSDS sheets for all listed chemicals.**

Chemical Name	Open or Closed Use	Flammability Rating	CBC Classification	Amount in Storage	Amount in Use	Location

Chemical Name – As listed on MSDS sheet.

Open or Closed Use – In order to classify as closed use the chemical cannot be open to the atmosphere at any time. Typically, closed use materials are limited to process piping.

Flammability Rating – Classification as defined by NFPA 30 and listed in CBC.

Flammable Liquids

Class I - Flash point below 100° F, Reid Vapor Pressure not exceeding 40 psia.

Class IA- Flash point below 73° F, boiling point below 100° F

Class IB- Flash point below 73° F, boiling point at or above 100° F

Class IC- Flash point at or above 73° F but below 100° F

Combustible Liquids

Class II- Flash point at or above between 100° F and below 140° F

Class III- Flash point at or above 140° F

Class IIIA - Flash point at or above 140° F but below 200° F

Class IIIB- Flash point at or above 200° F

CBC Classification – Combustible Dusts, Combustible Fiber, combustible liquid, Cryogenic Gas, Explosives, Flammable Gas, Flammable Liquid, Flammable Solid, Organic Peroxide, Oxidizing Gas, Oxidizer, Pyrophoric Material, Unstable Reative, Water Reactive, Corrosive, Highly Toxic, Toxic, other health hazard, inert.

Amount in Storage – in gallons or pounds.

Amount in use – in gallons or pounds.

Location – Designate the location of use or storage. If inside of a flammable liquids cabinet or control area please indicate.
